

# SUSTAINABILITY CHALLENGE 2024/2025

The Lorentz Center and the Dutch Climate Research Initiative KIN are seeking workshop ideas that address the question of how science and research can facilitate, guide, and accelerate system transitions towards sustainable, climate-resilient, and equitable societies and environments.

We are looking for innovative workshop ideas that bring together diverse areas of research, including e.g. natural and social sciences, as well as humanities, and different research practices, ranging from academic research to practice- and policy-oriented research to citizen science.

## What we look for

- \* an organizing team reflecting the transdisciplinary nature of the workshop
- \* an innovative scientific program, that takes us beyond current boundaries
- \* an open and interactive format, with very few lectures and lots of space for discussion
- \* an actionable workshop output (e.g., advice report, position paper, road map...)
- \* a diverse group of participants

## What we offer

- \* a 5-day workshop at the Lorentz Center in H2 2024/H1 2025
- \* workshop budget for e.g., travel and accommodation reimbursements up to 15 k€
- \* no registration fees or other organizational costs
- \* a professional support organization, under the philosophy "you do the research, we do the rest"

## Deadline

- \* 30 January 2024
