Chance is normally thought of as risky and a gamble, but these ‘story cubes’ encourage us to think how rolling the dice can move us forward.

**Enacting Chance**

*Ignorance, Insight and Intuition*

23 - 27 August 2021, Leiden, the Netherlands

**Topics**

- Can we train for chance encounters?
- Is chance an emergent property of circumstances?
- How does a situation of ignorance shift to one of discovery or insight?
- When and from what does a deserving hypothesis emerge?
- What epistemic and cognitive conditions can foster intuition?
- Can discoveries foster cases of epistemic illusions?
- What is the role of events in insightful restructuring?

**Scientific Organizers**

- Samantha Copeland, Delft University of Technology
- Selene Arfini, University of Pavia
- Wendy Ross, London Metropolitan University

The Lorentz Center organizes international workshops for researchers in all scientific disciplines. Its aim is to create an atmosphere that fosters collaborative work, discussions and interactions. For registration see: www.lorentzcenter.nl

This workshop is part of the NIAS-Lorentz Program, which brings together perspectives from humanities & social sciences with natural & technological sciences.

Chance is normally thought of as risky and a gamble, but these ‘story cubes’ encourage us to think how rolling the dice can move us forward.
