Rethinking how we approach sex and gender differences in the brain is an important step towards precision medicine.

The Lorentz Center organizes international workshops for researchers in all scientific disciplines. Its aim is to create an atmosphere that fosters collaborative work, discussions and interactions. For registration see: www.lorentzcenter.nl

This workshop is part of our collaboration with NIAS and aims to stimulate research in the humanities & social sciences.

Rethinking Sex in Neuroscience of Mental Health

Scientific Organizers

- Lara Wierenga, Leiden University
- Marieke Bos, Leiden University / Leiden Institute for Brain and Cognition (LIBC)
- Amber Ruigrok, University of Manchester / University of Cambridge
- Christian Tamnes, University of Oslo / Diakonhjemmet Hospital

Topics

- Sex and Gender Effects in the Brain
- Sex Differences in the Clinic
- Modelling Workshops Beyond Binary Approaches
