The Baryon Cycle of Protocluster Galaxies

Scientific Organizers

- Yannick Bahé, Leiden University
- Benedetta Vulcani, INAF - Astronomical Observatory of Padova
- Michael Balogh, University of Waterloo
- Gabriella De Lucia, INAF - Astronomical Observatory of Trieste
- Pascale Jablonka, École Polytechnique Fédérale de Lausanne

Topics

- The Place of Protoclusters in the High-Redshift Cosmic Web
- Identifying Protoclusters in Observations and Simulations
- Gas In- and Outflows in Protocluster Galaxies
- Star Formation in Protocluster Galaxies and the Onset of Environmental Quenching
- New Data from Ground- and Space-Based Telescopes
- Predicting the Baryon Cycle of Protocluster Galaxies from Simulations
