

List of research projects for the workshop:

1. Composition operators: A concrete approach to questions in general operator theory (PL: Eva A. Gallardo Gutiérrez, co-PL: Carl Cowen)
2. Compressions of the shift operator in one and several variables (PL: Pamela Gorkin, co-PL: Kelly Bickel)
3. An infinite dimensional inverse eigenvalue problem and related topics (PL: Dijana Ilisevic, co-PL: Fernanda Botelho)
4. Complex symmetric operators and related topics (PL: Ji Eun Lee, co-PL: Hyun-Kyoung Kwon)
5. Multiplication operators and structural projections on JBW*-triples (PL: Lina Oliveira, co-PL: Pauline Mellon)
